SUMMARY

Frontend Developer with 8 months of experience building production-grade React applications with a strong focus on performance, scalability, and real-time systems. Achieved 81% bundle size reduction (70MB → 13MB) and developed real-time dashboards using WebSockets. Skilled in optimizing rendering performance, handling complex async data flows, and building maintainable UI architectures.

SKILLS

- Frontend:** React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3
- State & Data:** React Query, REST APIs, WebSockets
- Performance:** Code Splitting, Lazy Loading, Bundle Optimization, Memoization
- Tools:** Git, Vite, NPM, Postman
- Others:** Flutter (Secondary)

EXPERIENCE

Frontend Developer

Aug 2025 – Present

FloorWalk Consultants Pvt. Ltd.

Indore, India

- Improved React application performance by reducing bundle size from 70MB → 13MB (-81%), decreasing load time (~6s → ~4s).
- Built real-time analytics dashboards using WebSockets for live data updates and monitoring.
- Developed scalable and reusable UI components, improving development speed and maintainability.
- Optimized rendering performance using efficient state management and memoization.
- Implemented authentication, file uploads, dashboards, and charts with complex API integrations.
- Integrated REST APIs with async handling, caching, and error management to improve reliability.
- Built multi-language UI system supporting 8+ languages.
- Collaborated with backend teams to adapt frontend to evolving APIs
- Built 2 cross-platform Flutter applications (secondary)

PROJECTS

TrackHire — Job Tracking Platform

[Preview](#) | [GitHub](#)

(React, Vite, Supabase, Clerk Authentication)

- Built a role-based job tracking platform for candidates & recruiters with authentication and dashboard workflows.
- Designed scalable frontend architecture with efficient API integration and async state handling.
- Implemented filtering, job status tracking, and dashboard views to streamline application management.
- Structured reusable components for long-term scalability and maintainability.

Code Book — Online Code Editor

[Preview](#) | [GitHub](#)

(React, Vite, Monaco Editor, Judge0, Gemini API)

- Built browser-based code editor with real-time code execution and AI-assisted debugging.
- Integrated external APIs for execution and AI suggestions, handling async workflows and failure states.
- Managed complex state updates for editor performance, ensuring smooth typing and execution experience.
- Optimized component structure to reduce unnecessary re-renders and improve responsiveness.

EDUCATION

Bachelor of Science in Information Technology

Aug 2022 – July 2025

Guru Nanak Dev University, Amritsar, India

CGPA: 6.4/10
